

## Alexandre Alves

Contributed by Administrator  
Tuesday, 02 March 2010

Alexandre Alves is a computer scientist, who has worked in the past decade on middleware; particularly around network management, CORBA, real-time distributed systems, J2EE, Web-Services, BPEL, OSGi, and most recently on Complex Event Processing (CEP). He is a co-author of the WS-BPEL 2.0 specification. He is currently employed by Oracle, previously having worked for BEA Systems as the architect for the product WebLogic Event Server, re-branded Oracle CEP.
